Summary

I'm a Generalist Game Programmer with a passion for architecture and clean code. I strive to create both modular and robust systems and am always willing to take feedback and learn from others to further widen my skill set.

Experience

MAG Interactive

March 2026 - Present

Game Developer Intern

- Working on the Game Team for Crozzle within MAG's in-house MVVM framework to develop and maintain a live-service mobile game.
- Contribute to game-side implementation and work alongside the Game Infrastructure/Framework team to improve shared systems and functionality.
- Leveraging app distribution and crash-reporting platforms such as Firebase and Crashlytics to monitor app health and diagnose issues.

Education

Futuregames, Stockholm

2024 - 2026

Game Programming, 550 yhp

2.5 year program focused on game programming in Unity C#, Unreal Engine C++ with a specialization on Custom Engine Development in C++.

Kungliga Tekniska Högskolan

2023 - 2024

Individual courses in Computer Programming - HI1024, Engineering and Information Skills - HF1005 and Computer Engineering - HE1028.

Projects

RNGOEngine

7 Weeks - Ongoing

Data Driven ECS Engine developed with EnTT and OpenGL

🔗 <https://www.oskarnorberg.dev/projects/RNGOEngine.html>

RNGOEngine is an in development C++ game engine runtime and editor with ECS, custom made OpenGL RHI Wrapper and RenderPass system.

C++, OpenGL, EnTT, ImGui

Lymbo

4 Weeks

Game Project developed at Futuregames

🔗 <https://www.oskarnorberg.dev/projects/Lymbo.html>

Surrealist exploration game in Unreal Engine 5. Utilized data-driven Unreal Engine features to develop a branching dialogue system and quest system.

C++, UE5

Skills

C#

.NET 2.1, Unity, VContainer, UniTask

C++

C++17-23, EnTT, ImGui, OpenGL

Java

JDK17, Swing

Engine & Tools

Unity

CMake
